## INTRODUCTION

Burgess pet care is a British family company with a 300-year heritage.

With our passion and expert knowledge we have been able to develop high quality and nutritious foods for a variety of animals from dogs to hamsters.

Our Excel brand was established in 1998 when we became the first to make single component extruded nuggets for rabbits. In 2014 we supported research by the University of Edinburgh which highlighted the impact of muesli style diets on the health of rabbits. As a result of this research we stopped making muesli for all animals.

Every year we run our Rabbit Awareness Week campaign which helps to educate rabbit owners and potential owners about the welfare needs of these wonderful animals.

We have created this handy booklet to keep a record of your rabbit's health checks and vaccinations. For more information and guides on rabbit health and welfare visit
